

From data to decision:

4.0 PREDICTIVE MAINTENANCE FOR AGITATORS

Detect before Reduce downtime

We've taken a step forward in our value proposition by integrating Industry 4.0 directly into our equipment:

Real-Time Monitoring and Predictive Maintenance.

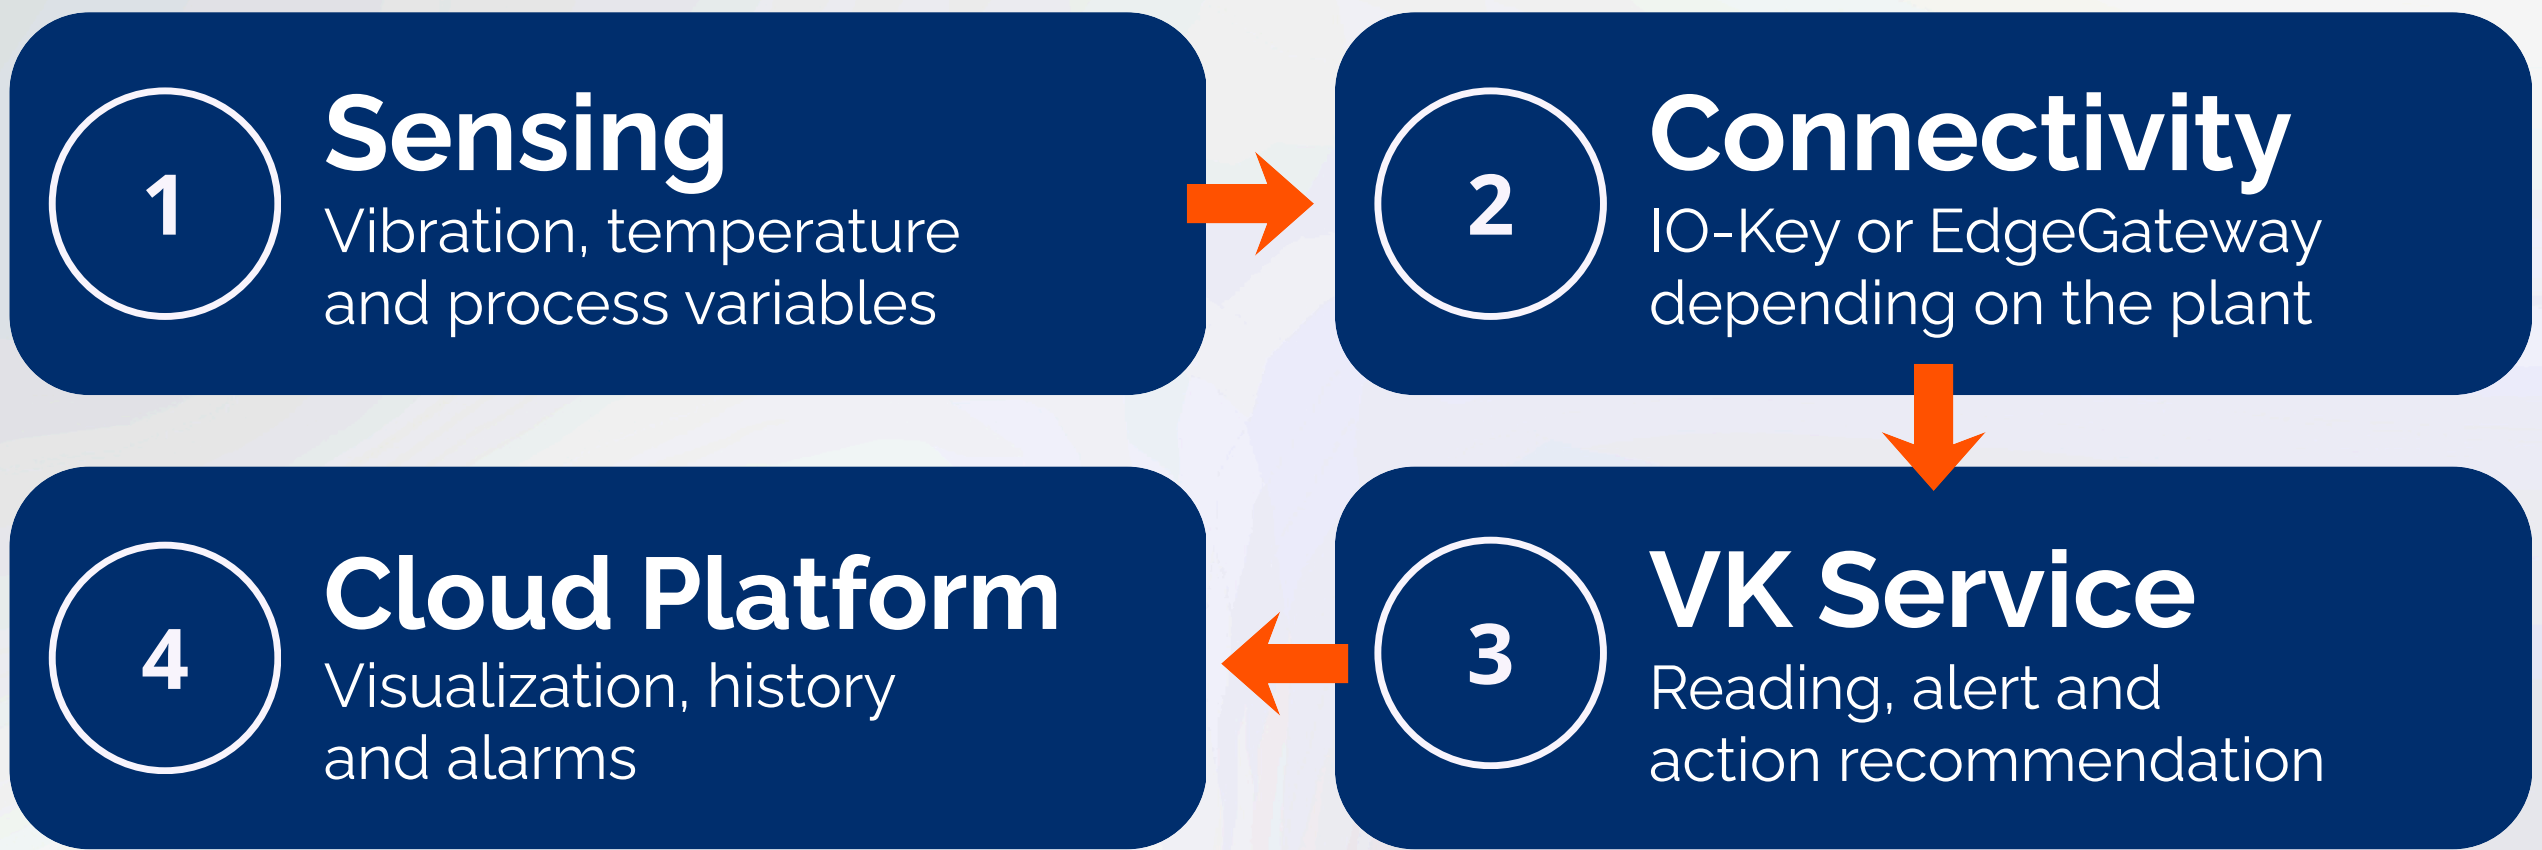

An unexpected shutdown gives no warning

VAK KIMSA IOT System

From the machine to the decision, in just four steps

Avoids lost hours, emergencies, breakdowns, critical spare parts, production downtime

Key Benefits

More reliability, less uncertainty, greater maintenance control

- Fewer unexpected shutdowns
- Scheduled maintenance
- Fewer routine tasks
- Improved OEE
- Longer service life
- Data-driven decisions
